## Detection of Fractures Stoneley Waves - Application - Example on a Oil Sinks in Algerian Sahara

D. Mabrouk\* (Laboratory Physics of the Earth)

### SUMMARY

---

In this paper, it is applied to acoustic data processing to study the fracturing tank oil on a well drilled horizontally using Stoneley waves  
the different stages of treatment allowed to detect, in a first step, areas of high attenuation energy .. The study of the Stoneley wave reflections has finally detect the fracture zones of the reservoir
